DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because they disclose a claimed invention that is an abstract idea as defined in the case *In re Warmerdam*, 33 F.3d 1354, 31 USPQ2d 1754 (Fed. Cir 1004).

Analysis: Claims 1-20 are to found in technological art since the invention is to be practiced by using computer. Claims 1-20 are disclosed by the applicant as being method claims therefor they need to be evaluated that claims can be performed just by using paper or pencil or series of step to be done by using computer to determine whether they statutory under 35 USC 101.

Examiner believes that the claims are nonstatutory because they are not new and useful and does not produces useful results so that its functionality can be realized. Hence, claims are merely manipulation of an abstract idea and therefore nonstatutory under 35 USC 101 and claims 1-20 are rejected under 35 USC 101.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2124

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-20 rejected under 35 U.S.C. 102(e) as being anticipated by anticipated by *Cheng et al* USPN 6,151,643.

Claims 1-10, 12-14, 16-19 and 20

Cheng et al teaches,

identifying the operator of the software application (see summary of the invention figures 1, 21-12 and 16, column 7, lines 40-53);

acquiring an operator profile responsive to the identified operator (column 19, lines 50-67, “user profile database...notification by email”);

setting a threshold value (column 20, lines 33-45);

configuring a functional interface responsive to the operator profile (column 19, lines 28-43, “update database... directly stored”);

Art Unit: 2124

monitoring the operator's use of the software (column 20, lines 62-67, "the service provide... table 2); and

modifying the functional interface when the threshold is exceeded (figures 2, 10-12, column 20, lines 47-59, "the user table.. new software update").

Claims 11 and 15

Cheng et al teaches,

- the addition of functional push button to the higher level interface (figure 3, column 23, lines 60-63, the user interface...").
